NIKHIL JAIN

Sr. Technical Lead in Atlassian @ Epam System | Agentic AI Product Engineer

7838493846 | nikhiljain180@gmail.com | linkedin.com/in/nikhiljain180/ | Gurgaon

Summary

Accomplished Sr. Technical Lead with 10+ years of experience architecting scalable **B2B/B2C** solutions and high-performance **Agentic AI systems**. Expert in constructing **autonomous AI workflows** utilizing **Node.js and React**, with a deep background in **Microservice and MicroFrontend architectures**. Proven ability to engineer multi-tenant systems integrating **RAG and LLM tool-calling**, significantly enhancing system autonomy and user engagement for global enterprise platforms.

Skills

AI Product Engineering

LLM Integration | RAG Workflows | GenAI Implementation | Agentic AI Integration | Vector Databases | Multi-tenant AI Architecture | Model Latency Optimisation | AI Agent Orchestration | LangChain | Guardrails

Backend & Infrastructure

Node.js | ExpressJs | REST APIs | GraphQL | Microservices | AWS | Docker | GRPC | Python | ElasticSearch | Docker | MongoDB | PostgreSQL | DynamoDB | Kubernetes | Perforamance Monitoring | | RAG | GenAI

Frontend Technologies

HTML | CSS | Javascript | Typescript | ReactJs | NextJS | MicroFrontend Architecture | Performance Monitoring | Web Vitals Monitoring | Accessibility | PWA | SEO | Modern Frontend Architecture | Server-side streaming

Leadership & Methodologies

Technical Lead | Mentoring | Architecture | Agile Methodologies | System Design | Code Reviews | Problem Solving | Team Building | Technical Monitoring | Collabration | Project Planning | Team Building

Work Experience

Sr. Technical Lead in Atlassian

05/2023 - Present

EPAM Systems

- **Spearheaded the architecture and migration** of traditional systems to **25+ scalable agentic AI platforms**, achieving **90% accuracy** and increasing **Jira automation from 37% to 85%**, resulting in **$4MN ARR savings** and a **70% productivity boost** for **100k+ users**.
- Developed production RAG systems, including a **Text-to-SQL** query engine for **DataBricks** and a **Lang Graph** workflow, reducing L1 triage time by **40%** and manual SQL creation by **25%**.
- Engineered and managed **multiple MCP servers**, developing tools for **ticket triage** and **incident context retrieval**, reducing root cause detection time by **30%** and enhancing operational visibility.
- Engineered an **AI-powered RAG application**, delivering dynamic UI admin dashboards from **L3 APIs** to address user needs and achieve **12k$/month in savings** for the organization
- Architected and implemented **backend services**, **GraphQL**, and **GRPC APIs**, streamlining the **SDLC** to manage **millions of QPS** and achieve **high scalability** and strict **SLOs**.
- Led **10+ developers** in architecting **microFrontend** and **microservice** apps for a multi-tenant system, overcoming **scalability challenges** by implementing BFF layer, CDN, and GraphQL router for **20+ applications**, boosting user experience; launched a unified **UI/Backend Library** and design system for **70+ teams**..

Senior Staff Software Engineer

01/2021 - 04/2023

Ocrolus East

- Led a **12-engineer** full-stack team to launch **microfrontend** and **microservice** applications, improving availability and security for **1,800+ clients** and **100K+ daily users**.
- Orchestrated the creation and deployment of a **scalable dashboard** and **fraud detection platform**, enhancing **real-time collaboration** and **document analysis** by integrating over **100 fraud indicators**.

Senior Member Of Technical Staff

11/2019 - 01/2021

Eightfold.ai

- Led **architectural design** for a global event recruiting platform and personalized career sites, leveraging **microservices** and **multitenant architecture** to serve **50+ enterprise clients** and enhance talent acquisition efficiency.
- Spearheaded the development of an AI-powered PWA, **improving candidate matching by 35%** and **reducing no-shows by 40%** to streamline recruitment.

Lead Engineer

04/2018 - 10/2019

RIVIGO Logistics

- Spearheaded development of **fuel analytics** and **route optimization** strategies to overcome high operational costs, achieving an **18% reduction** in fuel expenses and a **22% improvement** in delivery times.
- Overcame **scalability challenges** by architecting and deploying a **Node.js service**, now efficiently managing over **50,000 concurrent requests per second**.

Senior Software Engineer

02/2017 - 04/2018

Cleartrip.com

- Spearheaded the architecture and delivery of key business portals (sales, employee, supplier, analytics), overcoming **workflow inefficiencies** to boost process efficiency by **35%** and cut manual reporting by **50%**.

Senior Software Engineer

01/2016 - 02/2017

Gofro.com(MakeMyTrip)

- Spearheaded the launch of a **customizable travel package portal**, integrating flight, hotel, and activity services to address user demand for personalized planning, achieving a **30% increase in package bookings** and a **25% boost in user engagement**.
- Engineered a **real-time chat application** to address challenges in on-the-fly itinerary updates, achieving a **40% reduction** in modification turnaround time and a **20% increase** in customer satisfaction.

Software Engineer

2014 - 2016

UnitedHealth Group

- Directed **2 major projects** through the full SDLC, resolving **user experience challenges** for over **200,000 users**, achieving **successful product launches**.

Education

Bachelor of Technology

2009 - 2013

Guru Gobind Singh Indraprastha University
